ABOUT US

Backed by a highly-skilled staff with expertise in assemblies for a multitude of industries, the **Arctos Assembly Group** has provided full "built-to-print" contract manufacturing services for printed circuit board (PCB) assemblies, sub-assemblies and system-level assemblies (box builds) while also specializing in supply chain management and customized integration since 2001. Our facility has been granted ISO 9001:2008 certification by UL DQS Inc. and allows our assembly group to combine the power of a global supply chain with nimble, highly-responsive manufacturing operations; delivering a vertically-integrated product solution focused on high-quality rapid turnaround, expertly engineered prototyping, and cost-efficient solutions. Alongside our TyRex Technology Family partners, we provide quality support at every stage from design concept to production.

SERVICES

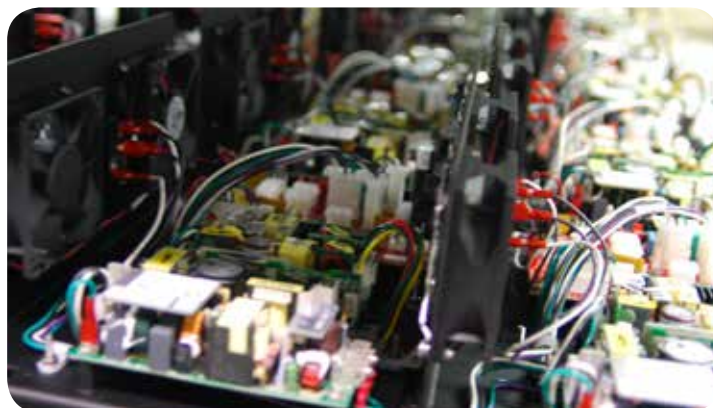

PCB, Sub & System-Level Assemblies

Systems Integration & Testing

Device (IC) Programming

Streamlined Order Fulfillment

Contract Manufacturing (Low - High Volume & Global)

Engineering Support

Process Engineering

Design for Manufacturing Review

Managed Inventory & Quick Assembly Ramp

Subcon Management

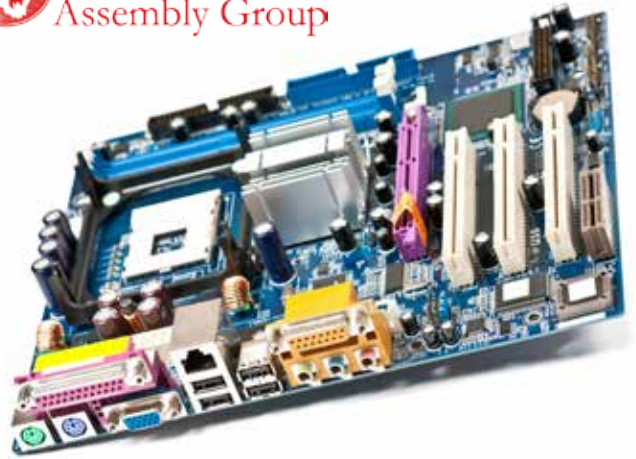

WHY ARCTOS?

Arctos provides the management, purchasing, testing, and on-time delivery for a wide variety of electronic assemblies. We are not bound to one type of product as many assembly groups are, and, as a result, are able to analyze each customer's product and fit a line solution according to the complexity of the product.

Additionally, many customers use our services for entire product lines, as our unique business model circumvents the bottlenecks and high costs associated with large equipment and, as a result, allows us to handle multiple products at one time without sacrificing quality, time or low costs. When your company's name is on the line, trust Arctos to deliver your project on time and under budget.

The following are the advantages of choosing Arctos for your next project over other groups:

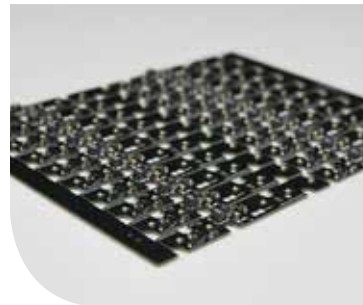

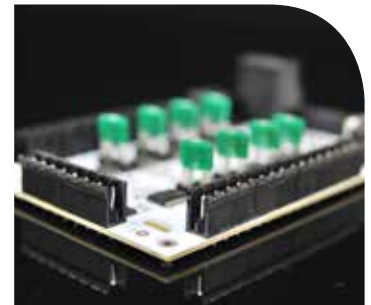

- **Keep project costs low across the board by passing on our low overhead savings to our customers.**
- **Turn projects around quickly by eliminating the bottlenecks created by bulky, expensive equipment.**
- **Support your products' manufacturing needs, whether quick-turn prototypes or full production.**
- **Efficiently manage and execute builds of any type, size or level of complexity.**
- **Manage all of your back-end operations, including project management, supply chain management, prototyping, production, reliability testing, burn-in, support, fulfillment and warehousing.**
- **Provide after-market services such as warranty repair and end-of-life product management.**

BOARDS

Our expert staff works on numerous types of PCB assemblies, including the following and many more:

- **Leaded PCBs**
- **RoHS-Compliant PCBs**
- **Rigid PCBs**
- **Flex PCBs**
- **FR-4 PCBs**
- **Metal PCBs**
- **Hybrid PCBs**
- **Single PCBs**
- **Double PCBs**
- **Multi-Layer PCBs**

COMPONENTS

Our team is also experienced on working with a wide range of assembly components, including:

- **BGA**
- **uBGA**
- **Fine-Pitch**
- **Through-Hole**
- **4 Mil**
- **Potting**
- **Coating**
